

1. What AWS service should I use for full-stack web and mobile development?
2. Can I enable canary deployment for an API Gateway stage?
3. Can the integration timeout for API Gateway be increased?
4. Can I enable caching for a specific API Gateway stage?
5. For which types of integration in API Gateway is a mapping template mandatory?
6. Can I store AWS AppConfig configurations in S3?
7. Can I send events from AWS AppConfig to Amazon EventBridge?
8. To which AWS services does AppRunner need a connection in VPC?
9. Can I suspend processes in an ASG?
10. What is the ASG process "ScheduledActions"?
11. Can I provide cross-account access to someone else's S3 bucket as a source for Athena?
12. What is the role of an Aurora Reader instance?
13. How do you use Stack Outputs in AWS CloudFormation?
14. What is the maximal timeout for a CloudFormation WaitCondition?
15. Is there any way to import already existing resources under CloudFormation stack control?
16. In which region must I upload a certificate to be used in AWS CloudFront?
17. Is there a Free Tier available for CloudHSM service?
18. How many HSMs should I have in my CloudHSM cluster?
19. What is the difference between a commit and a push in Git?
20. How does AWS CodeDeploy perform a rollback?
21. Can I use parameters from AWS CodeDeploy to modify the behavior of a deployment script?
22. What needs to be in the codedeploy.onpremise.yml OR conf.onpremise.yml file to allow on-premise CodeDeploy agent registration?
23. What is the purpose of the AWS CodeDeploy hook "BlockTraffic"?
24. How many times is each hook executed per deployment via AWS CodeDeploy to ECS?
25. What should be included in the Appspec file for deploying Lambda via AWS CodeDeploy?
26. Can I use EC2/ECS targets as hooks in Lambda deployment using AWS CodeDeploy?
27. What is a stage in AWS CodePipeline?
28. What is an AWS CodePipeline deployment group?
29. What AWS service should I use when I need to get a timeline of changes and compliance?
30. What is a CloudWatch alarm action?
31. What are the three states of an alarm in CloudWatch?
32. CloudWatch is validating whether actions assigned to an Alarm are properly configured. True/False
33. Can I synchronize data with AWS DataSync to EBS?

34. What are the benefits of using AWS Direct Connect?
35. What is the difference between DynamoDB and Amazon RDS?
36. What is the baseline throughput of an EBS gp3 volume?
37. How can I achieve faster startup of an EC2 instance?
38. What is special about the "t,m" types of EC2 instances?
39. What is a Dedicated Instance?
40. What are the three strategies that can be used in EC2 Spot Fleet?
41. What is the AWS CLI command for pulling a Docker image from ECR?
42. Can I change the encryption settings for an ECR repository after it has been created?
43. What is AWS Elastic Container Service (ECS)?
44. What is CW Container Insights?
45. If you are expecting a small workload, should you use ECS-EC2 or ECS-Fargate?
46. What are Kubernetes ingress objects in EKS?
47. What CLI command should I use in AWS Elastic Beanstalk to configure the current folder to be used by Elastic Beanstalk?
48. What CLI command should I use in AWS Elastic Beanstalk to set an environment variable?
49. AWS Gateway Load Balancer is a service that enables you to deploy and operate load balancers for APIs and WebSocket applications. True/False
50. Can I create TCP or UDP listeners on an ALB?
51. Is EMRFS regionally resilient in EMR?
52. Amazon EventBridge Pipes supports basic transformations using Velocity Template Language (VTL). True/False
53. Can FSX for Lustre be used by on-premises instances?
54. How does AWS Global Accelerator work?
55. Do I need to create an EventBridge rule for each region from which I want to receive AWS Health events?
56. What is a cross-account IAM role?
57. What is the priority order of deny/allow rules in IAM?
58. What is the difference between an IAM policy and an IAM group policy?
59. What is the purpose of IAM Access Analyzer?
60. Can I use Amazon ECR with Image Builder?
61. What are metrics in Amazon Lookout for Metrics?
62. Do I need to install the Inspector agent for AWS Inspector Classic?
63. Do I need to install the Inspector agent for AWS Inspector Classic - Network Reachability?
64. What metrics are available for monitoring an AWS Kinesis Data Stream in Amazon CloudWatch?
65. What is the Kinesis Client Library (KCL) in AWS Kinesis Data Streams?
66. What is the difference between Kinesis Producer Library (KPL) and Kinesis Client Library (KCL)?

67. What is the AWS KMS Key Policy?
68. Can I use KMS to encrypt an unencrypted S3 object?
69. What is a Data Lake?
70. What is a Lambda function runtime?
71. What is started in the "INIT" phase of an AWS Lambda function?
72. Is Amazon MQ running on servers or it serverless?
73. What AWS storage service is used by Amazon MQ Broker in a Multi-AZ configuration?
74. Can I use multiple firewall policies in a specific AWS Network Firewall?
75. What is the difference between AWS OpenSearch and AWS Elasticsearch?
76. What is the primary benefit of using AWS PrivateLink?
77. Is resource sharing via AWS RAM enabled by default in AWS Organizations?
78. How is a Tag-based Resource Group defined in AWS Resource Groups?
79. What is the Governance mode in the retention period of S3 Object Lock?
80. How can I define objects for S3 CRR replication?
81. Can a S3-presigned URL be used for uploading data?
82. What are the two types of actions in S3 Lifecycle Rules?
83. S3 bucket names must be globally unique. True/False
84. What programming languages are supported by the AWS SDK?
85. Is SCP applied to the master account in AWS Organizations?
86. What are the benefits of using SSM Run Command with AWS Systems Manager Inventory?
87. What can be a public AWS SSM parameter?
88. What SSM document can be used to send commands to the CloudWatch agent or configure it?
89. What SSM Patch Manager baseline can be used for Ubuntu?
90. What is the maximal runtime for an AWS Step Functions Express workflow?
91. Can I view the objects uploaded to S3 from AWS Storage Gateway's Volume Gateway's "cached volumes"?
92. What is an AWS session token?
93. What is AWS Transcribe?
94. What is the purpose of the parameter "enableDnsHostnames" in a VPC?
95. Is the Rule with the number "*" evaluated last or first in NACL?
96. How is the VPC Gateway Endpoint connected to the VPC?
97. How many VPCs can be created in an AWS Account?
98. Can I create a rule in AWS WAF Web ACL that checks for headers, query parameters, and URI paths?
99. On which AWS services can AWS WAF be used?
